

ENHANCED SAFETY KIT FOR OFFSHORE CAPSULES

SURVIVAL
SYSTEMS
INTERNATIONAL

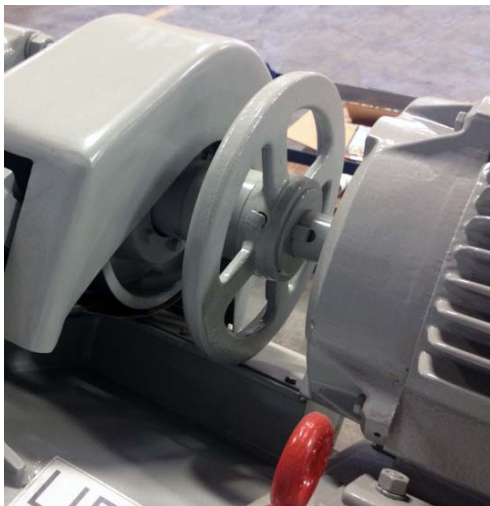

ADDED FEATURES - DESIGNED FOR YOUR CAPSULE - OEM CERTIFIED COMPONENTS - INSTALLED ONSITE - ADDED SAFETY

WINCH MOVING PARTS COVER (ESK.7012)

MODELS: Currently available for all SSI Winch models.

**SAFETY
BENEFITS:**

This kit provides additional safety by incorporating a metal cover over the winch's hand-wheel. Accidental contact with the rotating hand-wheel is prevented, decreasing the risk of harm to personnel as well as preventing equipment malfunction. The cover is a bolt-on assembly custom designed and engineered to fit perfectly onto your SSI winch housing without interfering with any winch functions. The cover is hinged with an easy to use handle allowing access to the hand-wheel when needed.

**WHAT
ARE
ESK's?**

ESK's are SSI's engineered packages of additional components (or modified components) to "add-on" to your existing SSI offshore capsule, winch and/or platform. The goal of these kits is to offer additional functionality, ease of operation and ultimately added safety to your Survival Systems International equipment. Since SSI is the OEM of your equipment, as well as the designer and manufacturer of these Enhanced Safety Kits, the installation process is seamless and cost effective.
