

ENHANCED SAFETY KIT FOR OFFSHORE CAPSULES

SURVIVAL
SYSTEMS
INTERNATIONAL

ADDED FEATURES - DESIGNED FOR YOUR CAPSULE - OEM CERTIFIED COMPONENTS - INSTALLED ONSITE - ADDED SAFETY

BACK-UP HYDRAULIC STARTER KIT

MODELS: Currently available for all SSI Capsules.

**SAFETY
BENEFITS:**

This kit provides the components and integration design to provide additional starting functions to the capsule's engine. This is a back-up hydraulic starter system, secondary to the already installed primary electric starter (which has redundant dual batteries). The secondary hydraulic starting system will provide the capsule with the capability to crank-on the engine in the event of a lack of engine start from the electric starter.

Components Include:

- Starter Unit
- Hydraulic Starter Accumulator
- Hydraulic Starter Hand Pump
- Spray Pump
- Brackets and Hardware

**WHAT
ARE
ESK's?**

ESK's are SSI's engineered packages of additional components (or modified components) to "add-on" to your existing SSI offshore capsule, winch and/or platform. The goal of these kits is to offer additional functionality, ease of operation and ultimately added safety to your Survival Systems International equipment. Since SSI is the OEM of your equipment, as well as the designer and manufacturer of these Enhanced Safety Kits, the installation process is seamless and cost effective.
