SURVIVAL
SYSTEMS
INTERNATIONAL

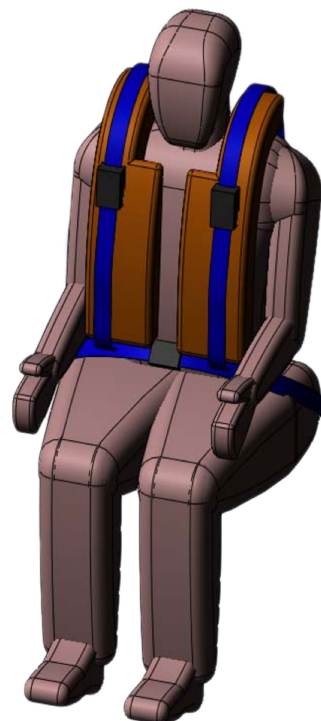

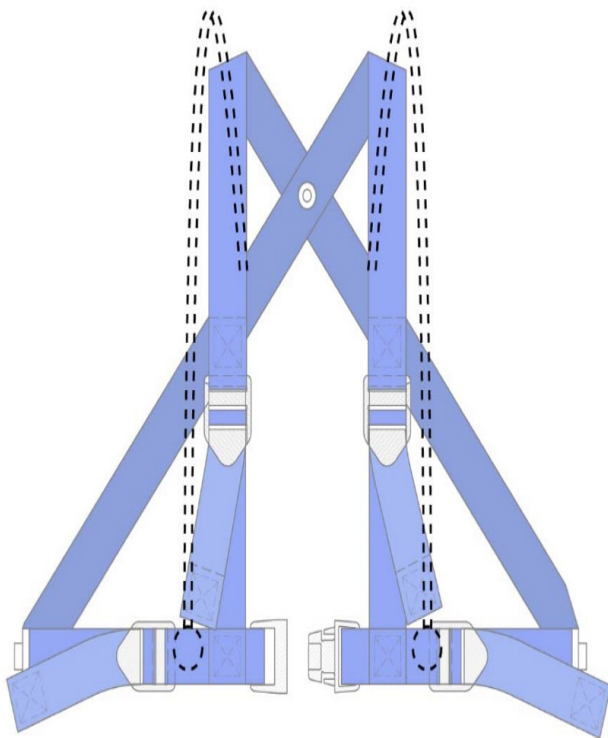

ADDED FEATURES - DESIGNED FOR YOUR CAPSULE - OEM CERTIFIED COMPONENTS - INSTALLED ONSITE - ADDED SAFETY

MULTI POINT SEAT BELT KIT

MODELS: Currently available for all SSI Capsules.

**SAFETY
BENEFITS:**

All model Survival Systems International capsules come with approved seat belts that are designed to fit the average passenger specifications. SSI follows the guidelines of the IMO LSA Code, and SSI capsules are approved to the applicable SOLAS lifeboat type. Design adheres to the guide of ASTM 1166 and its HFE (human factors engineering) specifications - as it relates to people, seating, seat belts, spacing and other standards.

**WHAT
ARE
ESK's?**

ESK's are SSI's engineered packages of additional components (or modified components) to "add-on" to your existing SSI offshore capsule, winch and/or platform. The goal of these kits is to offer additional functionality, ease of operation and ultimately added safety to your Survival Systems International equipment. Since SSI is the OEM of your equipment, as well as the designer and manufacturer of these Enhanced Safety Kits, the installation process is seamless and cost effective.
