

ENHANCED SAFETY KIT FOR OFFSHORE CAPSULES

SURVIVAL
SYSTEMS
INTERNATIONAL

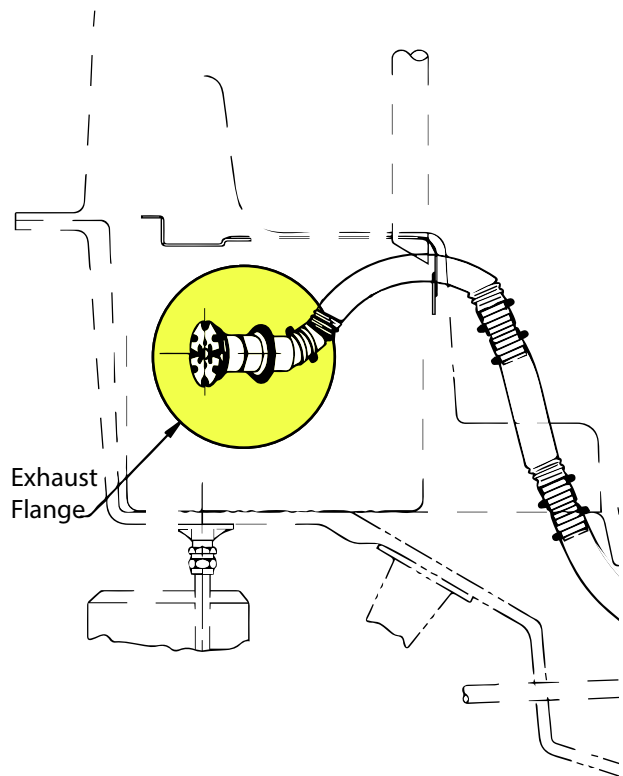

ADDED FEATURES - DESIGNED FOR YOUR CAPSULE - OEM CERTIFIED COMPONENTS - INSTALLED ONSITE - ADDED SAFETY

EXHAUST FLANGE UPGRADE KIT

MODELS: Currently available for all SSI Capsules.

SAFETY BENEFITS: This upgrade kit allows the user to conduct routine maintenance and check ups on the exhaust without the necessity of exterior access to the exhaust. This is advantageous for the user because without this upgrade performing routine maintenance poses several issues that involve time and money for our customers. With the exhaust flange upgrade kit you will no longer need to move the capsule to the deck or employ remote access to preform an exhaust ball change out.

WHAT ARE ESK's?

ESK's are SSI's engineered packages of additional components (or modified components) to "add-on" to your existing SSI offshore capsule, winch and/or platform. The goal of these kits is to offer additional functionality, ease of operation and ultimately added safety to your Survival Systems International equipment. Since SSI is the OEM of your equipment, as well as the designer and manufacturer of these Enhanced Safety Kits, the installation process is seamless and cost effective.
